The Most Eagerly Awaited Action Game of the Year!

NEW!

Aliens aren't your only worry—your former comrades are on your case, too!

A failed experiment has turned an old missile base into a maze of monster fodder.

FEATURES

- Licensed technology from id Software
- Dozens of aliens
- 16-bit color
- Smooth skeletal animation
- Up to 31 online opponents
- 3D and MMX support

Half-Life™

A decommissioned missile base infested with aliens. Not the typical suicide squads just waiting for you to finish them off. Aliens with brains. Their intelligence may be artificial but, hey, it's enough to make them think. And these aliens think they want to live, which pretty much means killing you. What's worse, they're working together in packs to hunt you down and fry your butt.

But don't worry, you still have a good head and a strong pair of shoulders. If you're smart enough to keep one firmly attached to the other long enough to put your firepower to work, you just might get through this thing alive.
